

## PowerSchool Parent Access – Single Sign On

PowerSchool allows parents to create a single sign on account where they can add and then view all of their student's information in their single login account (even if the students attend different schools). When a parent's single sign on account is created, an access code and password for each student must be entered. These codes will be provided to you from your child's attending school for each of your children.

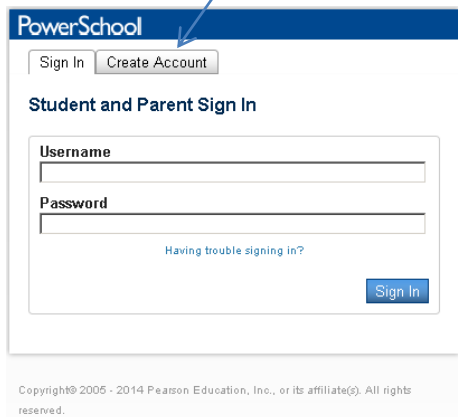

Please follow the instructions below carefully to create and link your students to your account.
